

Beycelik Gestamp Signs Women's Empowerment Principles

Working on the principles of combating gender-based inequality, minimizing the gender gap in the economic sphere, and ensuring that women in Turkey play a more active role in the country's economy, Beycelik Gestamp has signed another initiative supporting these principles. By signing the Women's Empowerment Principles (WEPs) in October, it has committed to providing high-level corporate leadership for gender equality, treating all women and men fairly at work, respecting human rights and the principle of non-discrimination, providing health, safety, and well-being for all women and men, supporting women with education, training, and professional development opportunities, implementing women-empowering entrepreneurial development, supply chain, and marketing approaches, promoting equality through community initiatives and support, and measuring progress towards gender equality.
