

## **Beyçelik Gestamp improved its score by two levels in the CDP Climate Change Program**

Beyçelik Gestamp, which operates in the automotive supply industry through a partnership between Beyçelik Holding and Spain's Gestamp, received a B+ rating in the 2024 Climate Change assessment by the Carbon Disclosure Project (CDP), the world's leading environmental reporting platform.

Beyçelik Gestamp thus raised its 2023 C+ rating by two notches. Beyçelik Gestamp has thus raised its score by two notches from C+ in 2023.

Beyçelik Gestamp, which designs, develops, and manufactures molds, equipment, and components for the automotive metal industry, received a B+ rating in the Climate Change 2024 assessment (Carbon Disclosure Project), which aims to reduce the effects of climate change and protect natural resources by reporting and transparently sharing company data. Beyçelik Gestamp has raised its score by two notches from C+ in 2023. Beyçelik Gestamp's Technology and Innovation Director Uğur Cem Yıldız noted that Beyçelik Gestamp has implemented carbon reduction projects and reported the carbon footprint of its domestic and international production facilities. Technology and Innovation Director Uğur Cem Yıldız stated, "In line with our sustainability approach, we plan to implement short, medium, and long-term carbon reduction projects in addition to providing social benefits. We see the transparent sharing of these efforts as our responsibility for tomorrow. We believe that our CDP rating will rise significantly thanks to the steps we will take with the same determination for a sustainable future, which is a common concern for all of us."
