

We Support Women's Employment

The “For My Country” project, which aims to promote social responsibility among Beyçelik Holding companies, employees, dealers, and suppliers, serves as an umbrella project. The project, which renews its theme every two years, aims to develop a more participatory attitude towards social issues and implement projects that will raise the standard of living.

Acting on this goal, our efforts to change perceptions within the company and complete the work to provide the physical environment and conditions resulted in the signing of an employment-guaranteed training protocol between the Bursa Provincial Directorate of Labor and Employment and our factory under the “On-the-Job Training Program” (OJT) Project.
